

# Backup Guide (browser)

**You must be logged in as Admin or a user with backup privileges to proceed**

**All backups made using a web browser will be saved in DAT .264 format and will require 'nPlayer' to view. To convert to AVI ,please use the 'Monitor Client' program.**

---

- Step 1  
Once logged in, left click on Download tab at top of screen
- Step 2  
On right side of screen, select Channel # needed for backup  
*(Only one channel can be backed up at a time. If you wish to backup multiple channels at once please use the Client Monitor program.)*
- Step 3  
Leave Type set to 'ALL'
- Step 4  
Select your start day and start time
- Step 5  
Select your end day and end time
- Step 6  
Click on Inquiry after selecting your start and end times
- Step 7  
If any video was found for channel selected, you will see file(s) appear in the display box.
- Step 8  
Next select your backup location by clicking Browse at the bottom
- Step 9  
Choose your file for backup by placing a check in the box next to the file
- Step 10  
Click on Download to start
- Step 11  
Allow a little time to pass and you will see a progress percentage appear  
Once download is finished, the percent will change to Complete
- Step 12  
Test your backup using nPlayer  
*(nPlayer can be found on the utility disk that came with the unit)*
