

Backup Guide (Monitor Client)

You must be logged in as Admin or a user with backup privileges to proceed

Note: It is best to have time / date and camera number ready before continuing

Step 1

Log into the Monitor Client software and left click on Playback

Step 2

Left click on 'Record Download' icon

Step 3

Select your recorder by clicking on Object icon

Step 4

In device list – select root device or expand device tree to select a camera

If you select a root device, all cameras will be backed up from it

Step 5

Store Place – Keep default At 'Device'

Step 6

File Type – Keep default at 'All Record'

Step 7

Select date / start time and end time

Step 8

If you also need a copy of the download as an AVI place a check in Convert AVI

Step 9

Click InQuiry to pool video from time requested. Any available video will appear in list

Step 10

Change downloads location if desired by clicking on  and selecting location

Step 11

You can select download to download a single file or you can place a check in multiple files and click Download Sel. --- A progress bar will appear ---

Step 12

Once all downloads are done close Records Download box
